25X1 9. [] During a conversation today Senator Sam Nunn (D., Ga.), of the Senate Armed Services Committee, said he thought we might have some problems regarding certain apparent inconsistencies between General Walters' affidavits and some of his Memos for Record which had been submitted to the Committee regarding some of his White House conversations in connection with the Watergate matter. I told Nunn I was aware there were some minor inconsistencies, but felt these were understandable in view of the circumstances, and particularly in the fact that the so-called Memos for Record were really nothing more than the General's personal notes which did not purport to be complete but were merely memory aids in case he should want to refresh his recollections at some future date.

25X1

25X1 11. [] Jack Ticer, Senate Armed Services Committee staff, called to advise that a copy of the transcript of the hearing of Thursday, 17 May, is available and arrangements were made for it to be picked up.

Later in the day Ticer called and asked for the names of the participants in the meeting Wednesday, 16 May, which was also attended by Senators Symington and Byrd and staff members Braswell and Woolsey. I subsequently advised him that Executive Branch participants were: Lt. Gen. Samuel Phillips, Director, National Security Agency; Frank Bartimo, Assistant General Counsel (Manpower & Reserve Affairs), DOD; and Ed Miller and Tom Smith, FBI; and Lawrence Houston and John Maury from this Agency.

Still later Ticer called at the direction of Senator Symington to ask when General Walters' memoranda and his affidavit were made available to our House Subcommittees. I told him they were delivered to Chairman Nedzi by John Maury on Friday, 18 May, and had also been made available to Chairman Mahon.
